Company: e2f Inc.

Location: Indonesia

Category: other-general

About e2f:e2f helps people and machines communicate naturally regardless of language, content, or culture. With expertise in data science - and deep roots providing agile translation in 200+ languages and dialects - e2f uniquely provides high-quality linguistic datasets of multilingual speech, text, annotation, and quality data required to help machines understand people. e2f customers include several of the world's most successful artificial intelligence (AI) and natural language processing (NLP) deployments.

Job Summary: Join our team as a Project Manager specializing in AI Data Collection and Localization on a project-based engagement. In this dynamic role, you will be instrumental in shaping the trajectory of AI-driven data and localization initiatives. We are seeking a proactive and dynamic individual with a minimum of 3 years of project management experience, specifically in AI or Localization domains. As a project-based professional, you will be responsible for overseeing the project lifecycle and collaborating closely with the Solution team to deliver high-quality AI models that align with our business objectives.

Requirements: Minimum of 3 years of project management experience within AI Data Collection/Data services sectors. Proactive project management approach with a proven track record of building strong relationships with teams and stakeholders. Demonstrated expertise in upselling within project contexts. Dynamic personality capable of thriving in fast-paced project environments. Flexibility to accommodate various time zones based on project needs.

Essential Skills and Qualifications: Solid understanding of AI/ML models and algorithms. Familiarity with project management methodologies such as Agile, Scrum, or Waterfall. Excellent English written and verbal communication skills, with proficiency in conflict resolution and negotiation. Highly organized with meticulous attention

to detail, adept at managing complex, multi-language projects. Ability to monitor project timelines, track progress against KPIs, and proactively mitigate risks. This presents an exciting opportunity for detail-oriented, results-driven individuals with a passion for Localization and AI-driven data projects. If you meet these qualifications and are ready to contribute to groundbreaking AI initiatives on a project basis, we encourage you to submit your application. #Li-remote
