Company: MadeIndonesia

Location: Kota Yogyakarta

Category: other-general

As a Back End Developer at MadeIndonesia, you will be responsible for building and maintaining the server-side of our web applications, ensuring high performance and responsiveness. You will work closely with our front end developers, designers, and other stakeholders to implement robust and scalable solutions. The task includes creating, maintaining, testing, and debugging the entire Back End. Conducting analysis of website and application requirements. Writing back-end code and building efficient PHP modules. Developing back-end portals with an optimized database. Evaluate software programs for performance issues, bugs, and design flaws. Responding to integration requests from front-end developers. Finalizing back-end features and testing web applications. Updating and altering application features to enhance performance.

Requirements

At least 1 year of working experience as Back-End Developer

Must be very familiar with developing a web application using PHP or its framework and cms like WordPress.

Expert knowledge of SQL and database technologies.

Knowledge of web services such as REST, AWS, and other APIs.

Knowledge of Git and GitHub.

Familiar with tools like Slack, Project Management (Trello, Jira, TeamGant etc).

Able to communicate in English. We speak in English with our clients as they are all from Europe. This communication takes place written and verbally.

Join our dynamic team and enjoy a range of amazing benefits, including:

- Free English classes to enhance your communication skills
- Daily lunch allowance
- Free unlimited coffee, tea, and healthy snacks from our full-time barista
- Top-notch working devices to help you do your job well
- Private health and BPJS insurance for peace of mind
- Sports activities to stay active and healthy
- Team building events to foster a fun and supportive work environment
