

## Lead Data Engineer

[Apply Now](#)

Company: Aliz Technologies

Location: Daerah Khusus Ibukota Jakarta

Category: other-general

We are looking for our first Lead Data Engineer in Jakarta who will create an amazing experience for our customers as they build and maintain solutions in the Google Cloud. Are you also passionate about big data and the cloud? If yes, then keep reading. You are looking for us if... a dynamic project environment excites you more than painfully slow development. Building things from scratch motivates you more than refactoring legacy codes. Working with different people on different problems is refreshing for you. Solely designing complex solutions doesn't satisfy you because you also want to actively take part in the implementation of your plans. Keeping your knowledge up-to-date is just as important to you as sharing it. We are looking for you if... you are a software or data architect with hands-on coding experience (preferably in Java/Python and SQL), at least 5 years. Finding the right tools for each problem is more important to you than becoming an expert in one specific tool. Talking directly to clients to understand their business needs is not outside your comfort zone. You want to use your technical leadership skills to guide both our engineers and our clients' engineers on their cloud journey. You have excellent communication skills in English. Your diverse role will include... being responsible for the end-to-end development lifecycle, presales activities and proof-of-concept delivery, architecting and creating data pipelines, data platforms, and data warehouses on Google Cloud Platform, tech leadership and mentorship, being a trusted technical consultant and trainer for our clients' tech teams. You will enjoy... using cutting-edge technologies, learning from A+ Big Data and Google Cloud experts and mentoring talented juniors, working anywhere you feel comfortable and productive, visiting cool places such as Singapore, Germany or Hungary. Check out our

Indonesia team by visiting our career page .Aliz was founded by a group of driven software engineers with one vision in mind: Build a human-centered company to solve exciting business challenges with cutting-edge technologies all around the globe.Our team includes engineers, industry experts, and digital professionals who ensure our clients are ready to face the challenges of the ever-changing digital world.Aliz is a proud Google Cloud Partner with specializations in Infrastructure, Data Analytics, Cloud Migration, and Machine Learning. We deliver data analytics, machine learning, infrastructure, and application development solutions, off the shelf, or custom-built on GCP using an agile, holistic approach.Life has been pretty exciting at Aliz recently. We dealt with the Covid crisis and ended up even stronger both financially and team-wise. And we became Google Cloud's Breakthrough Partner of the Year in APAC, built a team in Singapore and Berlin, opened an engineering hub in Jakarta, launched a business in Italy, and started to support IT education.You couldn't pick a better time to join this world-class team of cloud experts.Apply for this position Required\* Your full LinkedIn profile will be shared. Learn MoreWhat is your level of proficiency in English?\*How many years of experience do you have with SQL?\*How many years of experience do you have with Java?\*How many years of experience do you have with Python?\* How many years of experience do you have with the Google Cloud Platform?\*
