

## Senior Back End Developer

[Apply Now](#)

Company: MadeIndonesia

Location: Kota Yogyakarta

Category: other-general

As a Senior Back End Developer (PHP) at MadeIndonesia, you will play a key role in the development and maintenance of our server-side applications. You will collaborate with our cross-functional teams to build robust and scalable solutions, ensuring high performance and reliability. Conducting analysis of website and application requirements. Writing clean and efficient back-end code using PHP. Developing back-end architecture and database structures. Evaluating software programs for performance issues, bugs, and design flaws. Integrating data storage solutions and optimizing database queries. Collaborating with front-end developers to ensure seamless integration and functionality. Finalizing back-end features and conducting thorough testing. Updating and enhancing application features to improve performance and user experience. Responsible for mentoring and guiding junior developers. Provide assistance, share knowledge and experience, and help junior developers improve their skills.

**Requirements** Proven 3-5 years of experience as a Back End Developer, with expertise in PHP. Having experience with developing web applications using PHP or its frameworks and CMS like WordPress. Familiarity with version control systems (e.g., Git) and agile development methodologies. Understanding of software testing principles and experience with testing frameworks. Ability to collaborate effectively with cross-functional teams and communicate technical concepts. Strong problem-solving skills and attention to detail. Can work independently and are capable of taking on projects with minimal supervision. Join our dynamic team and enjoy a range of amazing benefits, including: Free English classes to enhance your communication skills Daily lunch allowance Free unlimited coffee, tea, and healthy snacks from our full-time barista Top-notch working devices to help
