

Senior Manual QA Engineer

[Apply Now](#)

Company: Jitera Inc.

Location: Indonesia

Category: other-general

Jitera, inc. is a startup company from Japan that makes software to automate the development of mobile and web applications, and do lots of client projects. Our product can be called as No-Code, Low-Code, and code generator. By using our product, we can develop software 10 times faster. It's under development with a lot of tries and errors, but the number of applications developed with our product is increasing, and in fact, there is a case that a mobile application was developed about 10 times faster than usual. As the characteristics of our company, we are a team of professionals working remotely, and we have a track record of significant growth over the past year in terms of revenue, product development, and team members.

Job Overview Our business is growing steadily, so we are expanding our QA team to implement products using Jitera's automation system. We are looking for talented QA who can plan tests for client projects and feedback a lot to improve the automation product, because we need to actually experience many projects to understand what architectures, features, business processes are required in our automation systems.

About The Role Create detailed, comprehensive, and well-structured test scenarios and test cases
Prioritise, plan and coordinate testing activities
Identify and unearth issues in the early stage of development
Reproduce issues from production and track until closure
Create and maintain test artefacts
Perform thorough regression testing when issues are resolved
Develop and apply testing processes for new and existing projects to meet client needs
Stay up-to-date with new testing tools and test strategies
Maintain a healthy environment, communicate with Engineers and the Manager
Work on multiple projects and teams
Learn new products quickly
Working Style Full remote. You can work from all over the world.

Of course, you can also work from your home. Full flex-time system. You can work anytime in your timezone, as long as you can attend regular team and company meetings. Over 5 years of experience in software quality assurance Experience in Web App Testing, Mobile App Testing, and Enterprise Software testing. Experience in leading and mentoring the QA team. Strong knowledge of software QA methodologies, and processes (Agile, Waterfall process) Experience in writing clear, concise, and comprehensive test scenarios and test cases with the basic Testing method Hands-on experience with black box testing Working independently with high priority and high recommended spirit Own it High responsibility and think about the quality of the product. Preferred qualifications: Experience working in an Agile/Scrum development process Experience in working as a software engineer Experience in working as a project (or product) manager Private health insurance premium MacBook will be provided Unlimited PTO Tax payment (maximum 10% of salary) Special events, occasions celebrations, and gifts Co-working space Sponsorship for classes according to your demand. For instance, we're providing English classes and some classes on Udemy.
