Company: PT Merdeka Battery Materials Tbk

Location: Indonesia

Category: other-general

PT Merdeka Battery Materials Tbk is a holding company with operating subsidiaries engaging in mining business activities, encompassing the exploration and future production of Nickel and other related minerals. Due to massive business expansion, PT Merdeka Battery Materials Tbk is looking for a competent candidate to support the business in various role with details as below:

Sr. Manager Exploration & Resource Development

Responsibilities (not limited to):

Maintain a strong involvement in QA/QC function to ensure that data supporting the resource models is fit for purpose.

Production of high quality, geologically valid, KCM/JORC compliant resource models.

Ensure the ongoing development of geological models and understanding of mine, resource, and regional scale geology.

Ensure drilling is targeted to deliver the annual growth in Ore Reserves as per the company strategy.

Provide key input into mine planning assumptions.

Completion of exploration and resource reports annually or at the completion of major resource updates.

Maintain effective and ongoing development of resource estimation techniques to ensure estimation methods conform with industry best practice.

Qualifications:

Minimum bachelor's degree in Geology engineering.

Minimum of 12 (Twelve) years' experience in a resource geology role preferably in the Nickel laterite mining industry (Preferred Micromine software expert).

Must be CPI PHE and MRE in mineral, preferred Nickel laterite.

Broad geological experience and supervision of drilling (RC & Diamond), sampling and QAQC programmes.

Demonstrated knowledge and experience in field exploration work, sampling, QAQC, block modelling, advanced grade estimation techniques, and reconciliation.

Familiar with budgeting cycles and the preparation and development of budgets and building strategic business plans.

Willing to be placed in Konawe with work schedule 5 weeks on 2 weeks off.
