Company: PT Belengkong Mineral Resources

Location: Indonesia

Category: other-general

PT Belengkong Mineral Resources (BMR) was founded in June 2007 as a private-owned company that works in operations and support, construction, product processing and transportation related to mining activities. Since its foundation, BMR aimed to be a reputable, nationwide mining company.

In 2008, BMR pursued a coal mining opportunity in Paser, East Kalimantan. Kalimantan accounts for more than 90% of the country coal production. East Kalimantan was the largest producer among the provinces, which produced 127 million ton in 2009. In addition, Kalimantan has a strategic location because it is close to fast emerging markets in Asia, notably China and India, making it competitive to other suppliers such as Australia.

In parallel to the massive increase of production, BMR took the initiative to apply Sistem Manajemen Kesehatan dan Keselamatan Kerja (SMK3), or Health and Occupational Safety Management System. The Company's commitment to enter the modern and industrialized era with a high demand of productivity and quality not only aims for increased revenue and profit, but also for continuous development in handling internal business processes, increasing performance and efficiency, and creating a greener, safer and healthier workplace. BMR plans to achieve the health and safety management system standardized to the international standards OHSAS 18001 and ISO 14001 and the national standard PP 50/2012 by early 2014.

BMR has extensive experience in open-pit mining operations for coal and iron ore in Kalimantan. BMR continues to improve its mining operations to become a major player in Indonesia mining industry through professionalism and care to employees, local community,

and environment.

We are looking for some candidates to join with us on one of our site,

Supervisor Surveyor

Requirements:

Usia
