

## UI/UX Designer Intern

[Apply Now](#)

Company: Geniebook

Location: Indonesia

Category: other-general

Loved by over 220,000 users, Geniebook is Singapore's largest online learning platform for English, Mathematics and Science (EMS) syllabi, with Chinese being our newest subject offering. From AI-personalised worksheets to live classes and teacher chats, we are a powerful suite of complementary learning products designed to help students accelerate their academic performance. We're looking out for amazing global talents to scale Geniebook exponentially across Southeast Asia, and we have many exciting roles opening up across a wide range of functions. So join us today to inspire a new generation of learners and help even more students learn smarter and do better!

**Job Scope** Utilize design tools and processes to develop new product design elements. Participate in peer reviews to assess design techniques and user experience success. Lead the enhancement of our current design system, including reusable elements, style guide, WCAG compliance, and developer instructions. Collaborate with team members at all levels, sharing design and development knowledge, resolving issues, and suggesting improvements. Engage in user-centered design methods, including research, exploration, story-telling, detailed design, journey mapping, and prototyping. Present actionable findings to improve the customer experience. Communicate design insights to Designers, Senior Designer, PM's and VP of Design. Document design notes, details, and processes relevant to each project involved. Partner with a UI/UX Designer to conduct user research and gather feedback for design enhancements.

**Requirements-**  
College/Design School Students seeking internship in fast-paced EduTech Industry- Able to communicate in English (speaking and writing)- Willing to commit with a minimum 3-months internship program (20 hours/week)- Have compatible laptop
